ITSL Group provide businesses and organisations with the tools they need to present with excellence!

INTEGRATED PRESENTATION SYSTEMS

King Sturge is a leading supplier of property services within the UK industrial, office, retail, hotels & leisure, healthcare and residential

sectors, they employ over 1,400 people in 22 locations. Their services include agency, building consultancy, business recovery, corporate real estate services, investment, lease consultancy, planning and valuations. They are expert in residential land and mixed-use developments and also offer a complete range of financial services to the property sector.

REQUIREMENT

The head office; located just off Regent Street, London is a large building housing over 500 staff over four floors. They have large number of meeting rooms across all floors with some large multiuse partitioned rooms that are used for large events. ITSL Group were requested to install an integrated AV system within the partitioned rooms with two zones of video and three zone of audio. Each of the room was required to be self sufficient, easily able to be combined for larger events and provide audio reinforcement for both voice and program audio sources.

SOLUTION

The approved system design comprised of two completely separate room systems with over with exception of audio processing function. Each room was specified with a Crestron TPS-6X touch panel and MC2E processor to control the rooms AV facilities, one of the rooms was designated as the lead room and was equipped with a lectern and the option to merge the audio zones to create a large conference room. The audio processing was handled by a Symetrix 4x4 DSP, this enabled the zoning to be controlled via the touch panel, the zones comprised of the two meeting rooms and a further zone in the main reception area. The video was provided via to Christie ceiling mounted projectors and two recessed tab tensioned Draper projector screens.
